pp. 39-42.

NEW COUNCIL BOOKLET ON HEALTH CAREERS

The Health Committee of the Council has completed a booklet on health careers. The first trial printing has been made and will be distributed throughout the region for comment before the final printing is made. The people to receive copies of the trial printing will be health officials and educators. They are the ones who are closely connected with the health careers and the student toward whom the booklet is directed.

The purpose of the booklet is to acquaint the young person with the health careers open to them. This booklet, unlike others of its kind, deals with health careers in the Appalachian South. It lists 33 careers and job opportunities in the region. There is a great need for more health personnel in the region and it is hoped that this booklet will help encourage young people to choose a health career and practice that career in the region.

It is the hope of the Health Committee that this booklet will be printed in such quantity that it will be distributed to all secondary schools, colleges and interest groups throughout the region. It will take about 20,000 copies of the booklet to do this job. The Council at the moment is trying to secure funds to publish the booklet in quantity.
